

An 80-Year-Old Just Used a Blood Pressure Monitor Correctly—For the First Time

SIMISAI - Universal Visual Guidance Platform

1st Place - Healthcare Track

AI Singapore Pan-SEA Challenge 2025

The \$50B Guidance Gap: When Tools Can't Keep Up with Complexity

A manufacturing facility in Singapore lost **\$52,000 in production** due to an operator unable to resolve a 30-second equipment error. Outdated manuals and unavailable expert guidance caused an 8-hour shutdown.

Regional Scale

- Southeast Asia lost **\$1.68 billion in 2024** to preventable operational incidents.
- 20% of these incidents are due to lack of immediate guidance.
- Enterprises spend \$8B annually on ineffective training.

Multi-Market Impact

- Consumer electronics: \$17B lost annually from confusion-driven returns.
- Retail: 40% of customers leave due to missing product information.
- This problem affects a **\$50 billion market** across enterprise, consumer, and retail sectors.

One Platform. Every Guidance Problem. Solved.

Instant Recognition

Object identified in seconds with 95%+ accuracy.

Real-Time Guidance

AR overlays provide step-by-step instructions.

Speaks Every Language

AI chat answers questions in 8 Southeast Asian languages.

Works Anywhere

Offline capability for remote sites.

Anyone Can Use It

User-friendly design for all skill levels.

Deploy Tomorrow

Production-ready and scalable on AWS.

Build Yourself

18 months, \$2M+ R&D, unproven tech.

Buy SIMISAI

Deploy next month, immediate savings, validated technology.

Government-Validated Technology: Healthcare Track Winner

The Challenge

- **Competition:** AI Singapore Pan-SEA AI Developer Challenge
- **Problem:** Reimagining Healthcare Access in Southeast Asia with LLMs
- **Solution:** Visual guidance (CV + LLM) for elderly (65+) with low digital literacy

The Results

95%

Device Detection Accuracy

85%

Task Completion Rate

On safety-critical medical devices

❑ Government-backed AI Singapore technical verification

Why This Matters

\$50B+ Market, 3 Immediate Revenue Streams

Enterprise Training & Support

Market: \$10B+ global (APAC: \$2B+)

Use Cases: Technical training, remote assistance, QA

Target: Manufacturing, logistics, field services

Consumer Smart Home/IoT

Market: \$150B+ global (APAC: \$30B+)

Use Cases: Assembly, setup, troubleshooting

Target: Electronics, furniture, appliances

Retail Technology

Market: \$25B+ global

Use Cases: In-store discovery, post-purchase support

Target: Retail chains, e-commerce

❑ **Why Southeast Asia First:** 680M population • Rapid digital transformation • Manufacturing hub • E-commerce growth

Multiple Revenue Streams, 75%+ Gross Margins

B2B Enterprise SaaS

\$2K-\$10K/month

Technical training, QA, and remote assistance for manufacturing, field services, and logistics.

B2B White-Label Licensing

\$50K-\$200K annual

Licensing to consumer electronics, furniture, and appliance brands.

B2B2C Platform Fees

10-20% revenue share

Platform fees from retail chains, e-commerce, and smart home ecosystems.

Gross Margins: 75%+ (software-only model)

☐ Risk Reversal: De-Risking Customer Adoption

- **90-Day Pilots:** Pay only after proven 30% training time reduction.
- **ROI Guarantee:** Refund pilot fees if no 6-month ROI.
- **No Lock-In:** Month-to-month after pilot.

Phased Approach: Enterprise First, Consumer Second, Medical Third

- 1** — Phase 1: Enterprise Validation
Months 0-6
Target: 3-5 Singapore enterprise pilots (manufacturing/logistics).
Goal: Prove ROI (30%+ training cost reduction, 50%+ faster technician dispatch).
- 2** — Phase 2: Consumer Partnerships
Months 6-12
Target: 2-3 white-label partnerships (electronics, furniture).
Goal: Achieve 100K+ end users and create scaling case studies.
- 3** — Phase 3: Scale & Medical Expansion
Months 12-24
Expansion: Thailand, Indonesia, Vietnam; add retail & begin medical regulatory pathway.
Goal: 500K+ users, \$3M+ ARR.

This strategy prioritizes rapid revenue generation from enterprise and consumer markets, leveraging medical validation as proof of technology superiority.

Why We'll Win (Even Against Google)

📄 The Elephant in the Room: What if Google builds this?

Here's why we win—and why we hope they try.

Data Network Effects

With 100K+ users and millions of device detections, our CV accuracy will be 10x better. They'll be 18 months behind.

Linguistic Advantage

Powered by Singapore's **Sealion LLM**, tailored for SEA languages and technical terminology. Google Translate can't compete for specialized guidance. [A deep linguistic moat.](#)

Distribution Lock-In

We're embedded into enterprise workflows and consumer brand ecosystems. **High switching costs** mean we'll own distribution before competitors can enter.

Acquisition Target

If Google wants this space, they'll **buy us**, not build from scratch. Remember Instagram? That's your [20x exit](#).

We don't fear big tech. We're building the category they'll want to acquire.

Production MVP: Pilots Launching Q2 2025

01

Current Status

- Award-winning, AI Singapore validated MVP
- Deployed on AWS with 500+ medical device users

02

Next 6 Months (Q2-Q3 2025)

- 3 enterprise pilot programs (Manufacturing, Logistics, Field Services)
- 1 white-label partnership for consumer electronics
- Milestone: 1K enterprise, 10K consumer users; \$100K+ ARR

03

Next 12-24 Months (Q4 2025-Q2 2026)

- 10 enterprise clients, 5 white-label partnerships
- Geographic expansion: Thailand, Indonesia, Vietnam
- Milestone: 100K+ active users; \$3M+ ARR

We have strong traction, validated technology, and a clear path to commercial scale across high-value verticals.

The Ask: \$1.2M Seed Round

Closing March 31st, 2025

\$1.2M

Seed Round

\$400K

Committed

\$800K

Remaining

For 2-3 investors

Key Allocations

- **40% Engineering:** Scale platform, add 50+ device models
- **30% Go-to-Market:** Enterprise pilots, partnerships
- **20% Operations:** Team expansion (2-3 hires)
- **10% Contingency:** Strategic buffer

Use of Funds:

- Engineering
- Go-to-Market
- Operations
- Contingency

Runway: 18-24 months to Series A (\$3M+ ARR, 100K+ users)

Why NOW?

Market Window

We're **18 months ahead**. By Q2 2026, with 100,000 users, we'll be unassailable.

Pilots Launching Q2

3 enterprise pilots start April 2025. Invest now for re-pricing at 3-5x valuation by Series A.

Government Leverage

I2Start (\$800K non-dilutive) closes Q2 2025. This doubles your effective capital to \$2M.

📌 **Early Investor Bonus:** First \$500K gets a board advisory seat and access to AI Singapore mentor network.
