

**NEXT WAVE (INDIA)****SITAGLIPTIN TABLETS USP 50 MG****PART-II****P.8 STABILITY****P8.1 Stability Summary and Conclusion****General Information:**

Product:		Sitagliptin Tablets USP 50 mg
Composition		Each film coated tablet contains: Sitagliptin Phosphate USP Eq. to Sitagliptin 50 mg Excipients q. s. Approved colour used
Dosage Form		Oral Tablet
Batch Size		100,000 Tablets
Batch Number		NW036A1, NW036A2, NW036A3
Manufacturing Date		01/2022 (all three consecutive batches)
Packaging/Container closer system		Each Alu-Opaque PVC Blister pack of 10 tablets. Such 3 Alu-opaque PVC blisters packed in the unit carton along with pack insert (3x10 Tablets).
Objective of the Study		To evaluate the physical, chemical & microbiological characteristics of the medicine for fixing the shelf life of the product.
Period of Investigation		Proposed 36 months
Temperature and Humidity	Accelerated	40°C ± 2°C and 75 % RH ± 5 %
	Real time	30°C ± 2°C and 75 % RH ± 5 %
Frequency of Testing:	Accelerated	Initial, 1 Month, 3 Months and 6 Months
	Real time	Initial, 3 Months, 6 Months, 9 Months, 12 Months, 18 Months, 24 Months and 36 Months.
Originating Site		Next Wave (India) Village Rampurghat, Tehsil Paonta Sahib, District Sirmour, Himachal Pradesh, (INDIA)
Conclusion		As per the stability study reports product is stable up to 36 months at 30°C ± 2°C & 75 % RH ± 5 %.

Stress Stability Study: Forced degradation studies used to establish degradation pathway based on the condition, high temperature, humidity, light, etc.

Conclusion: Based on forced degradation study data, it is well evident that after significant degradation in different stress conditions, the peak of main analyte is separate from impurity

generated and also the total degradation in different stress conditions is between 0-13% (Limit 0-20%) and mass balance in different stress conditions is between 90.77% to 99.92% (Limit NLT 90.0%), so it can be concluded that the HPLC method for Related substances is Stability indicating and suitable for routine and stability analysis.
